

## Sensor List

| Description of sensors                       | Type    | Photo Sample  |
|--|---------|---|
| Thermometer ip67<br>-55°C σε +125°C          | Analog  |    |
| Wind speed meter<br>ανέμου 0-50m/s           | Analog  |   |
| Wind speed and<br>direction meter<br>0-65m/s | Analog  |  |
| Fuel level meter                             | Analog  |  |
| Level switch                                 | Digital | For fuel tanks , water tanks<br>and other tanks.                                      |
| Engine Rpm sensor                            | Analog  | High frequency<br>proximity sensor  |
| Smoke sensor                                 | Digital |  |

## Sensor List

| Description of sensors                      | Type                            | Photo Sample  |
|---|---------------------------------|---|
| Door sensor                                 | Digital                         |    |
| Movement sensor                             | Digital                         |   |
| Gas sensor                                  | Digital                         |    |
| Sea Depth meter                             | Digital                         | Under development   |
| ID verification                             | Digital                         |    |
| GSM interpolation device detector (jamming) | Digital                         | Security sensor that can detect interpolation device active. This devices cut the communication with GSM network and uses for defective system using GSM for alarming events. |
| Camera                                      |                                 |   |
| Can bus sensor                              | It reads the data of the engine |    |
